

## Carborundum Insert Stair Nosing

Superior foot positioning to help prevent slips and stumbles.

### Description

The most popular type of Stair Nosing, made of high quality aluminium with durable tape carborundum inserts. Great on high traffic including exposed stairways. Perfect for places such as Airports, Shopping Plazas and Public Domains.

Available in the very popular short lip or longer lip style. Easy to glue and or screw for installation.

Complies to the current Australian Standards AS NZS 1428.4.1 and has available accredited certification.

Our range of Carborundum insert stair nosings include:

- 1C10 - with a 10mm nose
- 1CP35 - with a 35mm nose
- 1C10Flush - a 10mm nose that sits flush against a timber substrate
- 1C10Black - a 10mm nose with a black finish
