

Solid Epoxy Carborundum Insert Stair Nosing

Description

The Solid Epoxy Carborundum Stair Nosing, is made of solid high quality aluminium. Great on high traffic including exposed stairways due to its very solid nature and incredible heavy duty wear. Perfect for places such as Airports, Shopping Plazas and Public Domains. Available in the very popular short lip or longer lip style. Easy to glue and or screw for installation. Complies to the current Australian Standards AS NZS 1428.4.1 and has available accredited certification. Our range of Carborundum insert stair nosings include:

- 4C10 - with a 10mm nose
- 4C35 - with a 35mm nose
- 4C10Flush - with a 10mm nose that sits flush against a timber substrate
- 4C10Carpet - with a 10mm nose for carpet installation

Benefits

Slip Resistance, Hi Traffic
