

Foris Entry Matting

Description

Made to Measure Entry Matting.

Foris combines two types of high resilience polyamide fibers for the brushing action and multi-filaments for the absorption effect. The open tufting construction provides room for dirt storage, whilst allowing easy dirt release during maintenance.

Key features and benefits

- Superior fine dirt and moisture removal
- Helps to keep floor clean and safe
- Easy to clean, simply vacuum, sweep, hose down
- Made to measure
- Can include bevelled edges

Perfect for:

Entrance areas and hallways where floor protection and safety is important.

Benefits

Slip Resistance, Entrance, Custom, Hi Traffic, Eyecatching, Suitable for Dry Areas
