

Weldsafe Mat

Description

The Weldsafe Mat is specifically formulated to repel sparks and hot metal shards. Its thick rubber surface has a melt point of over 260 degrees Celsius. The super resistant Nitricell sponge base is a nitrile rubber composite that offers unparalleled comfort during long shifts. Key Features

- All edges are bevelled to make this an effective non trip, non-slip mat.
- Specifically formulated to repel sparks and hot metal shards
- Offers extra durability in heavy use situations
- Gives unparalleled support and comfort during long, strenuous shifts.

Mat Specifications

Uses: Welding environments

Materials: Rubber Surface/Nitricell Sponge backing. Bevelled safety edges.

Thickness: 12mm

Colours: Black

Perfect for:

Welding environments

Uses

Welding Environments

Standard Mat Sizes

600 x 900mm

**Colours Available**

Black

Compound

Rubber Surface/Nitricell Sponge backing.

Thickness

12mm

Edges

Bevelled safety edges.
