

Cord Cover - Carpet

Reduce Trip Hazards and protect electrical and data cables on soft floors.

Description

Too often electrical or computer leads are left snaking across a carpet and create trip hazards. Now, with Cord Cover, that problem can be resolved easily, quickly and inexpensively - with the important benefit of preventing trips and stumbles.

Cord Cover consists of a tough 1m long x 100mm wide, flexible vinyl strip with carpet-gripping VELCRO Brand fasteners along both of the long sides. The cord is laid on the carpet and the Cord Cover placed over the cord with the VELCRO Brand fasteners attaching the cover to the carpet on either side.

KEY FEATURES:

- Standard length of 1m or also available in rolls of 10m and 30m
