

Coir Mats

Heavy duty coir matting for busting heavy duty dirt.

Description

Mat World's Coir Matting is made in Europe from premium natural coco fibres (coir) from the outer husk of coconuts. When used in heavy duty mats, coir provides superb scraping properties to ensure that heavy residue such as thick mud and hearty dirt stays on the coir mat and isn't spread throughout the workspace.

KEY FEATURES

- The fibre in our top quality Coir Matting is fused to heavy duty PVC backing
- Is best installed securely in recesses
- Available in a range of thicknesses, which will suit most existing recesses
- Our Coir matting can also be custom made to the specifications of existing recesses
